

NOVAX LINEMAN GLOVE

your preferred global partner in electrical safety

High Level Protection
Only From NOVAX

NOVAX is now placed in a strong position to achieve its vision of being the preferred partner in the electrical safety industry.

NOVAX[®]
ELECTRICAL SAFETY

To ensure superior performance, **NOVAX rubber insulating gloves** are produced from specially compounded latex that offers excellent dielectric properties combined with great flexibility, strength and durability. We electrically test every glove prior to shipment. Each batch of gloves is also subjected to a battery of physical and electrical tests. The skills and experience in latex dipping process acquired over more than 20 years resulted in the development of **NOVAX rubber insulating gloves, which easily meet and even surpass the requirements of ASTM D120, NFPA 70E and EN 60903.**

CE0194

Certified to ISO 9001:2008
Cert. No.: AR 1196

The contoured shape & softness reduces hand fatigue.
Every single NOVAX Glove is tested, inspected and packed according to the requirements in ASTM D120 and EN 60903.
The gloves are numbered individually for traceability and stamped with the factory manufacturing date by ink stamp.
